

COVIDO'S & COVIDON'TS: @HOME

During COVID-19, when there is community spread, it is possible that even those you know well could carry the virus without knowing it. So how can you meet with someone who is not an immediate household member?

Calvin Ball
Howard County Executive

DO choose outdoor or well ventilated spaces.

DON'T forget your masks. Every member of the group should wear one.

DO maintain at least 6 feet of distance from people who don't live in your immediate household. *(Sorry; no hugs!)*

DON'T shake hands or make other close contact. *(Skip fist bumps and elbow touches, too.)*

DO wash your hands for at least 20 seconds when you arrive and depart, and before eating.

DON'T worry if there's no sink immediately handy; reach for FDA-approved hand sanitizer instead.
