Description
A project to plan, design and implement streetscape and parking improvements in Ellicott City. The Ellicott City Master Plan effort will identify strategies to address parking, signage, and pedestrian needs in downtown Ellicott City. Knowing that this is an immediate need, this project will be used to advance one or more strategies by supporting predevelopment analyses and/or design immediately following the Master Plan effort.

Justification
As Ellicott City continues to rebuild from the tragic flood on July 30, 2016, one of the most frequent areas of improvement identified by the community has been the post flood condition of the sidewalks and with the current parking system. This project will be essential in developing strategies to improve street character, signage, accommodate the parking demands of the community, and support the economic development of the town. The project supports PlanHoward 2030 policy by fostering a diverse economy and future job and business growth opportunities.

Remarks
1. This project will rely on recommendations made through the master planning process starting in May 2017.
2. This project will refine and implement recommendations relating to parking, signage and sidewalks, from the master plan.

Project Schedule
FY19 - Pending completion of the Ellicott City Master Plan
## Fiscal 2019 Capital Budget
