

Project Status

The project is at the final design stage, and projected to start construction by summer/fall of 2022, once land acquisition and utility relocations are completed.

All graphics and renderings from tonight's meeting will be available at:

J4206 Relocated Montevideo Road, Phase I, Segment B

Thank you for attending this public meeting. If you have any comments, please email Mr. Abdul Akbari with DPW Transportation and Special Projects Division at aakbari@howardcountymd.gov

*Be sure to fill out
comment sheets!*

PURPOSE AND NEED

- Complete the relocation of Montevideo Road to US 1 at the Port Capital Drive signalized intersection, allowing for the removal of the existing traffic signal at the US 1 and existing Montevideo Road intersection, with this intersection being converted to a right in and right out and will eliminate the closely spaced traffic signals along US 1.
- Provide safer access along the relocated Montevideo Road corridor by incorporating standard lane widths, adding a center turn lane, crosswalks, and proposed sidewalks along both sides of the roadway.
- Provide direct access for emergency services from the new Waterloo Fire Station to the south.

KEY PROJECT INFO:

- Montevideo Road is classified as a major collector, per Plan Howard 2030 Transportation Plan.
- New typical section consists of 13' through lanes, 12' center turn lane, and 5' concrete sidewalks.
- This project is expected to begin construction in the Summer/Fall of 2022, pending land acquisition and utility relocations.
- Construction cost estimate is \$2.7 million and the capital project is currently fully funded.
- Existing Montevideo Road will be detoured during construction as necessary to complete the vertical grade revisions, however, this detour will not be in affect until relocated Montevideo Road has been constructed and open to traffic.
