## Howard County Issues a Heat Advisory in Response to High Temperatures

COLUMBIA, MD – In response to the heat advisory issued by the National Weather Service, Dr. Maura J. Rossman, Howard County Health Officer, has issued a public advisory for Howard County due to continuing high temperatures. The advisory has been issued for Thursday, August 4 from 11:00 a.m. until 8:00 p.m. with high temperatures expected to be in the mid-90s. The high temperatures combined with high humidity will make outside temperatures feel even hotter with heat index values reaching up to 106 degrees Fahrenheit. High temperatures and high humidity may cause heat illness to occur.

The warning signs of heat-related illness include the following: light-headedness, headaches, muscle cramps, mild nausea or confusion, fatigue or profuse sweating and rapid breathing. All residents are encouraged to take a common-sense approach to the extreme heat and take the following precautions to prevent heat related illness:

- NEVER leave children or pets unattended in a parked car or other hot environment.
- If you must be out in the heat, wear light-colored, light-weight, loose-fitting clothing, a hat and sunscreen.
- Stay well hydrated. Drink water and caffeine-free liquids. Avoid alcoholic beverages. (Alcoholic beverages **do not** keep you hydrated.)
- Stay out of the sun during the hours of 10:00a.m. and 3:00p.m.
- Take frequent rest breaks in air conditioned or shaded environments.
- Check on elderly friends, family and neighbors. Be aware of the symptoms of heat related illness: extreme weakness, muscle cramps, nausea, headache, possible vomiting or fainting, dry red skin.
- Additional heat safety resources can be found on the Health Department website [here](#).

Howard County residents in need of a cooler environment can visit one of Howard County's [Community Centers](#), [50+ Centers](#), or [Library branches](#) during normal hours. Anyone in need of shelter or other assistance should call the Grassroots hotline at 410-531-6677.

As with any other emergency, citizens should call 9-1-1 if they encounter a heat related emergency. For more detailed information, visit the Health Department website at [www.hchealth.org](http://www.hchealth.org).
