

July 25, 2016 Update:

The project remains in design of Phase I with the 60% Design submittal due July 7/26/16. Clark Construction is administrating requests for proposals to dryer vendors. Dryer selection is needed in order to proceed with Phase II design. Dryer site visits have taken place for all four of the vendors under consideration. On July 15th to July 20th a team of representatives from the County, HDR Engineering, and Clark Construction visited sites in Switzerland and Germany to vet one of the four vendors who currently does not have belt dryer installations in the United States. Requests for Proposals are due in late-August and a selection should be made by mid-September.

Europe Site Visit

1. In and Out of Zurich, Switzerland
2. Mainz, Germany
 - 1st generation belt dryer, installed in 1993
3. Bruchsal, Germany
 - Haarslev belt dryer manufacturing headquarters
4. Albstadt, Germany
 - 2nd generation belt dryer, installed in 2012
5. Schaffhausen, Switzerland
 - 3rd generation belt dryer, installed in 2013

Albstadt - Dryer

Albstadt – Product and Silo
