<td>The community desperately needs a traffic light here. The development across the street from Lorien Nursing + Rehab Center, which I am the manager of, has added even more traffic to the already dangerous intersection. I have experienced multiple accidents (as witness) first hand. They typically happen when vehicles are making Left Hand Turns out. I know people make right turns and get to the fica market to turn around. I believe the traffic study could be skewed. Employees who live in the apartments have to cross the street. Employees and other citizens have the bus stop across the street. A recent accident of a 90 year old man who was the caregiver of a current resident has been especially concerning. He had a major injury and that has left the lady without a caregiver. Please get the light in there! Any questions, I am happy to talk.</td>

**Note:** The comments above are a sample of the data from the US 1 Open House Comments section. The full document contains a comprehensive list of comments related to the safety evaluation of US 1.
| Car | General | 29 | I would like to see more pedestrian sidewalks and crosswalks along Rt 1 where there are RTA bus stops. Also, we have people we serve here at the MSC that travel by bike especially between our center & heading north on Rt 1. I would encourage the County to take that into consideration. Specific intersections that could benefit with more sidewalks: Guilford Road & Rt. 1 Corridor Road & Rt. 1  | Laura Evans | levans@howardcountymd.gov | 9900 Washington Boulevard, Laurel, MD 20723 |
| Car; Walk; Other | Rt. 1 and N. Laurel plus general | 31 | Laurel City has sidewalks and connection N. 1 Rd to those allows residents of NL Park to walk to Main St. or the MARC. Also, community members would be able to walk to Rt. 1 stores & restaurants. Many residents can’t afford cars so we have a lot of bike riders along Rt 1, even at night. Other intersections with a lot of walking potential Madison & Rt. 1 + Hill St & Rt 1 + Whiskey Bottom Rd & Rt. 1. Another area of walkers is 175 + Rt. 1, again to reach restaurants & shops by residents.  | Donna Thewes | dthewes@hotmail.com | 9515 Cassell Ave, Laurel, MD 20723 |
| Bike | General | 33 | Increase coordination with DPZ, DPW on capital projects study installation of pedestrian bridges in corridor analyze crash data in police dept. discourage residential development adhere to general plan and route 1 plan Deploy Arlo cameras to conduct pedestrian surveys Divert traffic to Dorsey Run Rd. - truck traffic Rezoning needs to consider  | Chris Alleva |  |  |
| Car | Both | 35 | Signage - Vegetation needs to be removed from existing signs to make them visible. (DPW) Addiitional signage is needed. Enforcement - Is totally lacking. PLEASE enforce speed limits and site aggressive drivers regularly. Do not announce sobriety checkpoints ahead of time. Bus stop sites - should include a concrete pad to stand on and a safe route to it (either sidewalks or crosswalks) Given that one loads a bus from one side of the street and is returned to the opposite side more crosswalks are crucial. Maintenance of roadbed - potholes and rough surfaces cause drivers to swerve creating extra hazards. Overdevelopment (right to the extent of the ROW) is severely limiting options for sidewalk + adds to use of US 1. Crosswalks needed @ US 1 + Freestate Crosswalks needed @ US 1 + Gorman Hawk signal needed @ US 1 + Country Meadows apartment w/ crosswalks US 1 South + Howard St. in Savage needs pole mounted light at eye height since autos sitting at light are at eye level for north bound traffic signal. Leading to Rt 1 Howard Street needs complete sidewalks plus safe way to cross from Baltimore Street. Rt 1 South coming off exit from 32 east - Road has history of crumbling due to heavy Trucks Rt 1 + Whiskey Bottom needs entire redo - addition of Coastal Sunbelt Produce Rt 1 + Columbia Street (@ TOD) will need signals, Turn lanes, crosswalks. Southern entrance floods frequently. Rt1 @ 175 turning left from eastbound 175 - lane disappears abruptly. This intersection does align straight along US 1.  | Susan Garber | buzysusan23@yahoo.com | 9100 Gorman Road, Laurel, MD 20723 |
| Car; Bus | Both | 37 | (1) Trucks parked at California Inn property. Trucks turned onto Whiskey Bottom Road then onto Route 1 blocked the entire road - (W.B R.) (2) Widened Route by adding one lane going North and another South (3) Bicycle lane and walking path on both sides (north & south) on Route 1 (4) Sidewalk in area on Guilford Road - put side walk and bicycle lane.  | BH Foster |  |  |
| Car | Both California Inn & Whiskey Bottom Rd | 39 | Large Trucks park @ CA Inn and turn onto Whiskey Bottom Rd, a safety hazard when they turn onto Whiskey Bottom Rd. Need to mark (signage) on Rt 1 where the shoulder runs out just before it intersects w/ Whiskey Bottom Rd. All of Rt. 1 needs sidewalks for pedestrians  | Angela Peebles | peebsea@aol.com | 10115 Stansfield Road, Laurel, MD 20723 |
| Car | General | 41 | I believe that there should be sidewalks all along Rt. 1, especially @ the intersections: Whiskey Bottom + Rt. 1 - is most dangerous  | Sandra Carr | carindsr@aol.com | 9615 Barrel House Road, Laurel, MD 20723 |
| Car | Specific Rt 1/32 intersection Guilford Rt. 1 | 43 | Howard County need more sidewalk in areas where the bus stops, shopping + service areas are  | Joan Washington | jwashington@howardcountymd.gov | 9900 Washington Boulevard, Laurel, MD 20723 |
| Car; Bus | General | 45 | Impossible to make a 0 turn out of MSC to go North. Very dangerous - Walkers + bikes always at risk  |  |  |  |
At the split south there should be sidewalks on both sides. Pedestrian crossing at Brewer.

On northbound rt 1 there should be a crossing between Valencia & N Laurel Soup kitchen that serves nightly on Rt 1/Gorman (Elisabeth House/Fish House). Folks need to be able to cross between Valencia and there.

Treacherous strip from Guilford N to Truck Stop needs sidewalks both sides and Peestrian walk at Patuxent Range due to major industrial park and jobs.

Major unskilled labor employment corridor from Guilford to the Truck stop (Rt 175).

A light/traffic control is desperately needed. I have intimately been involved and witness to this intersection. The left turns are very dangerous for not only those making the left run but also to those going 50-60 mph. The area is being development more and more and I see more cars as well as people walking down the road. Bus stops are also nearby but there area not sidewalks.

The new CVS along with the notorious flea market has more and more people walking. I am the Administrator at Lorien Nursing & Rehab Center and we have overflow of the flea market walking to park at our facility sometimes. The traffic light is desperately needed! Thank you

John Mangione Jr.

jmangionejr@lorienhealth.com

7615 Washington Blvd, Elkridge, MD 21075

I believe there should be a traffic light at 7615 Washington Blvd. In the limited time I’ve worked at this location I am aware of at least one incident involving a visitor turning left outside our building and resulting in an accident.

There is also a bit of risk turning left into the facility; the hills on the road present limited visibility on this turn that make it difficult to see oncoming traffic.

A crosswalk to the other side of the street would also be useful

Nick Mangione

nmangione@lorienhealth.com

7615 Washington Blvd, Elkridge, MD 21075

In the afternoons when traffic backs up I frequently witness cars using the right-turn lane from Northbound Rt. 1 to Freestate to cut around traffic stopped behind the light. They travel at a high rate of speed and cut in front of cars accelerating when the light turns green, creating a hazardous merging condition.

George Berkheimer

gberkheimer@lorienhealth.com

9343 Steeple Ct, Laurel, MD 20723

Keeping weeds trimmed at median at 195 (east) + Rt 1. Turning left from northbound 1 onto 195 (east) can be hard to see oncoming traffic. Support making Rt 1 more safe for cyclists but do not support opening the underground tunnel under Rt 1/Main St.

Sidewalk on Montgomery Road between Old Washington Blvd + Rt 1. Sidewalk is lacking from Montgomery Road (Elkridge Landing Elementary campus) + Green Valley/Cindy’s. Kids walk this/parents walk this. Large semi trucks end up traveling down Hanover Road then turning ton Old Washington Road + getting stuck.

Side walks on south side of Rt 1 (East side). Many bus stops in grass/snow.

More crossing at lights along Rt 1. Lighting main street in Elkridge. Consistent along Rt 1.

Several footbridges along Rt 1 but only with a consistent aesthetic design that is sustainable + able to keep clean.

No sidewalks (or few) between northbound Rt 1 + Montgomery Rd. Foot traffic along northern Rt 1 can be many with possible substance abuse + not following pedestrian laws + police presence.

Unsafe tot lot on Montgomery Road.

Can’t left turns without Decreased visibility at Brumbaugh St/Washington Blvd + turn left.

<td>As a North Laurel resident, I can’t emphasize enough how important this study is. It’s critical that non-vehicular transportation modes along route 1 be improved. There are so many people in that area and it’s barely safe/friendly for cars, much less bikes and pedestrians. I’d highly encourage a solution that re-engineers the traffic pattern, including &quot;bike lanes&quot;. Please encourage neighboring PG county to do the same.</td>

| Castillo-Cruz, Monica   | MCCruz@howardcountymd.gov | Cassough, Christopher <CEatough@howardcountymd.gov> | Wed 9/6/2017 2:51 PM | Intersection of Bluestream Dr and Route 1       | Good afternoon, Cassough, 

I am a resident in the Dorset Gardens at Bluestream community in Elkridge. I bought my house in 2014 and from the builders I was told that there was a short term plan to put traffic lights in the main entrance of my community at the intersection of Bluestream Dr. and Route 1. Unfortunately there is not even a sign of that project to be started soon, I have talked to our community Home Association and they don’t have any type of information regarding this matter. It has become an every second dangerous driving when trying to cross to the other side of the road or making a turn into our community from the other side of the road, there is a blind point where a driver can’t see the cars that are coming from the opposite way and heavy trucks traffic is very common in that area.

There is a new CVS built on route 1 just a minute away of my community and all the traffic lights needed for that business were set immediately with no delays, I don’t know if you are the person who can give me an answer, but at least I will appreciate to provide some referrals to contact the appropriate authority who is in charge of this. Thanks, 

Monica Castillo-Cruz, CLC                                                                                                                                                                                                 |
| Chenchdog@aol.com        |                          | Cassough, Christopher <CEatough@howardcountymd.gov> | Tue 9/19/2017 6:06 AM | US 1 corridor safety - public input sessions     | Regarding US 1 corridor safety - public input sessions  

In regard to your interest in safety issues on US Route 1 between Elkridge and North Laurel, I would like to propose the following:  
1. A traffic light on Route 1 at Gatewood Drive. Brentwood Manor, which is entered via Gatewood Drive off of Route 1, is home to 210 families. With traffic increasing along the corridor, it is getting more and more difficult to enter and exit the development. When making a left onto southbound Route 1, drivers must wait for northbound lanes to clear. Likewise, when entering from southbound lanes, drivers must drive in the southbound fast lane waiting for northbound lanes to clear. This site has been the scene of accidents, some resulting in injuries. I personally had my car totaled when I was making a left from the southbound lanes into Gatewood Drive.  
2. A sidewalk from Gatewood Drive to the shopping center at Route 1/Guilford Road. Many people currently walk on the shoulders of Route 1, sometimes walking on the edge of the road. This, of course, is dangerous. As walking is an alternative to driving, this would be beneficial for both health and environmental reasons.  

Thank you for your consideration of the above.                                                                                                                                                                                                                                                                                                                                                                           |
| Debbie Mack              | debbi@debbimack.com       | Feedback Form           | Mon 10/2/2017 9:35 PM | US 1 Safety Evaluation Feedback Form            | Making Route One more pedestrian- and bike-friendly should be a priority, not only in the short-term, but in the long-term. It would also help to keep Smart Growth in mind when approving new developments along the Route One corridor. I want to see Route One improved, but not overrun with even more traffic. Thanks, Debbie                                                                                                                                                                                                                      |
| Erin Cassell             | erin@rollupndye.com       | Cassough, Christopher <CEatough@howardcountymd.gov> | Tue 9/5/2017 2:56 PM | US 1 Safety Evaluation Feedback Form            | One more thing  

Forgot to put a dot at that spot by the cleaners where making a left turn from Old Washington back onto Rt. 1 is kinda nuts. Not sure what can be done. But folks anticipate that and so they cause a big backup on Montgomery. They want to turn onto Rt. 1 South safety... }                                                                                                                                                                                                                       |

US 1 comments

Dear Mr. Eatough,

First I want to say that I am very excited to hear there is an evaluation being done to see if there are ways that Route 1 in Howard County can be made safer and more user friendly for pedestrians and others.

I would say the biggest issue that I see with Route 1, is there is no real good way for pedestrians to get from one side of the street to the other. Additionally, sidewalks are almost non-existent and where there are sidewalks they are only on one side of the street. It would be wonderful if there could be a concerted effort to add nice wide sidewalks that cover distances to make them worthwhile to even put in. Secondly, I know this may never happen, but since this study is being done, I have to add that it would be fantastic if a pedestrian bridge could be added to an area by the new library. The new library is going to be a wonderful addition to this area and it would be great if people of all ages could utilize it by having an extremely safe way to get from one side of the road to the other. It is feasible for me to walk to the new library from where I live but I will more than likely never do so because of how precarious it would be to cross Route 1. I would imagine every parent in the area would feel the same way and that is a shame.

To sum up most important concerns from my perspective:

1. More sidewalks
Eatough, Christopher <CEatough@howardcountymd.gov>
Sun 9/24/2017 2:32 PM
Sidewalks on Rt. 1, Elkridge to Laurel
Mr. Eatough,
I have not lived in Elkridge a long time, but I do plan on living here for the better part of the rest of my life. In the three years my family has lived here we have enjoyed how much access we have to many forms of entertainment and education. That said, one thing that comes up regularly in conversations as we turn off Louden onto Rt. 1/ Washington Ave is the lack of sidewalks combined with the number of bus stops. I love the fact that there is public transport so close and available, but quite frankly I'm hesitant to use it because I don't want to be standing in the weeds on the side of Rt 1 with my kids, or even by myself. There are at least two bus stops (possibly more) I can't really tell between Elkridge and Jessup on Rt 1. I don't only have no sidewalks to access it, but they don't even have a small side of concrete to stand on, so the option is stand on the shoulders of the road (good luck with that), or stand in the weeds. It's just unacceptable. It is a substantial safety risk, and reduces the ability and willingness of people to use public transportation. Is it so much to ask that sidewalks be put in for safety and access? Even as a driver, I would feel better about the fact I'd be less likely to encounter someone walking home from the bus stop after a long day at work in the dark on the side of the road. I don't want to hit anyone, I'm sure they also don't want to be hit. Let's decrease those odds to the smallest possible.
Thank you very much for your time and for letting me share my view.

Rt. 1 and Guilford Rd. intersection
Hi Chris,
Please add these comments to those I sent you Sept. 25th. I hope these are all my observations and concerns about the subject intersection.
I think a pedestrian path should be painted across Rt. 1, along with an audible pedestrian station pushbutton, from the auto repair shop to the restaurant across the street, on both sides. AND NOW. Before a pedestrian is hit by a car or truck. I'm told SHA needs to do it.
The man I told you about before on crutches who I saw on Sunday, Sept. 24, well I saw him again on Thurs. Sept. 28 waiting to cross Rt. 1. And on Tues. Sept. 26 four young men were trying to cross Rt. 1. And I just have never noticed people crossing Rt. 1 before.
There are four lanes of traffic going in both directions on Rt. 1, two lanes go straight, one goes to the right with no light, a car can go when it's safe, and the left turn is tricky, you have a green arrow, or a red flashing arrow, or a red light. And coming from Guilford Rd. to turn right onto Rt. 1, a person can take the turn. And if a handicapped person is trying to cross Rt. 1, that would be dangerous.
I drove down Mission Rd., turned right onto Rt. 1 and continued to the Salvation Army store and they are hoping for a bus stop. This is a busy intersection and dangerous, lots of red arrows with the lights too. Not so many semis or construction trucks on the weekend.
I hope you add these comments to those I sent you Sept. 25th. I hope these are all my observations and concerns about the subject intersection.
I think a pedestrian path should be painted across Rt. 1, along with an audible pedestrian station pushbutton, from the auto repair shop to the restaurant across the street, on both sides. AND NOW. Before a pedestrian is hit by a car or truck. I'm told SHA needs to do it.

Re: Rt 1 survey
Hi Chris, I do not want to attend meetings, but will email you input from me about Rt. 1 pedestrian traffic, in fact, am heading out now to check speed limits, signs, etc. My input concerns Rt. 1 and Guilford Rd. Intersection where I have recently seen handicapped people crossing the street on the weekend. Last wk a man with a walker finally crossed Rt. 1. Yesterday, traffic on Rt. 1 heading from Elkridge area toward Savage stopped while a man with crutches slowly crossed the street. I was across the street in my car at the red light on Guilford Rd. A homeless shelter opened in Aug. on Guilford Rd. I do not know if the handicapped people were headed to the shelter. There is a sidewalk being prepared past the Salvation Army store and they are hoping for a bus stop. This is a busy intersection and dangerous, lots of red arrows with the lights too. Not so many semis or construction trucks on the weekend.
I will add to this later, thanks.

| 09/21/2017 | Route 1 Bicycle/Pedestrian Safety Open House Meetings | Before moving to Columbia, we lived five years in Elkridge Crossing, near Rt. 1 and Montgomery Rd. As a regular part of my commute, I rode my bike back and forth to the Dorsey MARC station. I was broadsided twice at the same intersection. I thought it might help to share a narrative I sent to my County Council rep at the time:  
I live in Elkridge and commute back and forth to my job in Bethesda by MARC train, Metro, and bicycle. Because the Howard Transit system doesn’t start early enough in the morning, I bike the first 4.5 miles from my house to the Dorsey MARC station. I wear reflective clothing, use front and back lights, have a bell and a helmet and everything else required by law. I take the more roundabout route to the MARC station (down Rt. 100), because Rt. 100 is illegal for bikes—on short, I try to do everything the way I’m supposed to.  
Last Fall, I was struck by a car on my way to the train station. I was heading south on Rt. 1, and he was pulling out from the stop sign at Hunt Club Rd. I was going uphill, so even though it was raining, I had complete control over my vehicle. He said he didn’t see me, and when I was passing in front of him, he pulled out and knocked me over. The driver seemed pretty shaken, and I felt OK, so I didn’t call the police. We did exchange information, and I opened up a claim with his insurance. They determined that I was liable for not running a headlight. Because their client claimed he didn’t see me, they assumed I was not complying with the law and rejected my claim. Lesson learned. |

<td>10/04/2017</td>
<td>US 1 Safety Evaluation Feedback Form</td>
<td>On June 10th, 2010, my friend, my service dog and I were stopped (3rd car) at the light at the end of the southbound ramp going from Route 32 East to southbound Route #1 in Savage, MD. While at a complete stop at the light, &amp; waiting for cars ahead to proceed, we were hit from behind by a huge LEXUS SUV driven by a lady (in her 60’s), whom I saw in my rear view mirror come to a full stop behind me car. After several seconds, the first car in line began to edge onto Route #1 S. The traffic light was still red. Suddenly, with a large jolt, I was hit from behind by this SUV! This slightly injured both people and also threw my service dog (who, thankfully, was tethered in the backseat), forward, into the space between the front two seats of my car. The force of her car hitting mine also slammed my car into hitting the car in front of me, twice; once from the initial impact and then, again, by her continued momentum. We were stunned! At this point, all three cars then pulled safely over onto the side of Route #1 to get out of the traffic flow. It was approx. 4:30 PM and then there a line of traffic behind us on the ramp. We &amp; the driver &amp; passenger of the car in front of me (that I was pushed into) immediately exited ours cars, made sure there were no serious injuries, then exchanged insurance &amp; license information. Our two passengers began taking pictures of damage to both our vehicles. Strangely, the offending driver NEVER exited her vehicle, but said, “I’m so sorry to all,” and offered me her license through her window. Within two minutes, a male driver pulled up yelled at her and told her not to talk. Odd! But no serious injuries &amp; we all agreed what happened.</td>

| 10/15/2017 | Pedestrian Sign | Hi Chris,  
I saw a sign today (Sunday), I forget where, while I was driving around, birding. It was large, yellow, showed a person walking on it (in black) and said Pedestrian Ahead. Maybe Rt. 1/Guilford Rd. needs that sign too, along with what I already suggested.  
I have two more observations/comments. (1) Last Friday, I was turning right from Guilford Rd., onto Rt. 1, with green lights in three directions, but a man with one crutch was crossing Rt. 1 on the other side from where I was, and I had to stop and wait. A car is in back of me was right on my butt, we waited. I never had to wait for a pedestrian there before. (2) On Sept. 30th, Saturday, I saw a homeless man walk in front of the shelter’s sidewalk, he walked across Rt. 1, got a drink, sat on a stump for a while. So I think people from the shelter are crossing Rt. 1, and it’s very dangerous for them and for drivers in cars.  
Thanks for listening.  
Sue Neri |
Was riding over there this weekend, and took a picture. Note the worn path where people are walking up and over the CSX tracks.

The Google street view shot is great in showing the bottleneck here on Route 1.

Google map shows how the CSX tracks cut Main St in half.

The tunnel and access would need a lot of work to bring to modern standards. Also the old tracks operating overhead will make it tough as well. I can't imagine how to do it, LOL. But maybe the county, state, and CSX would pool money to solve several problems with one project, and companies out there know how to do this stuff.

Also, down the road, I noticed a sign at Volleyball House parking lot that seemed to imply more RiverWatch apartments will be built. This is nearby and I believe RiverWatch is a state/county affordable housing project.

It does feel to me like there is greater density and need right now further south on route 1, but there are elements at this location that might plug in well to grants: CSX risk management, State Route 1, new nearby affordable housing project the county wants to succeed, restoring a bisected Main Street, etc.

Just wanted to feed you some observations and ideas if you want to pursue. Its fine with me if you have other things you want to do

Comments: I am resident of Dorset Gardens community located at Blue Stream Dr and US-1 hwy intersection. When making a turn into or out of Blue Stream Dr from/to US-1 highway, the double-dip of the road makes it extremely hard to see the oncoming vehicles. Many times I personally have had a close shave situation because of this issue. Due to the high speed limit, this issue becomes even more acute. There also have been multiple accidents at this intersection. Also, many of my neighbors also have experienced the same issue multiple times. I think this intersection desperately needs a signalized traffic signal (with stop light). Otherwise it looks to be just a matter of time when the current situation is going to lead to loss of limbs or life. Please take this matter extremely seriously. Hoping this matter can be resolved at the earliest.
Regards,
Gaurav Bhatia

Comments: Greenfield to Route one... ramp should be closed. Way to many close-calls for people making a illegal left turn going Northbound on Rt. 1 off that ramp. There is two other exits in the Rockburn community. While this one is convenient it posses safety concerns due to people making this illegal turn. To beautify the area of Route one; plant arborvitae evergreens (or similar) along some of the unsightly industrial areas especially across from near Ducketts Lane and across from Rowanberry/Rt. 1 down to Amberton.

Comments: This study ends at Levring Avenue, when it should continue to the Patapsco River Bridge. There needs to be a sidewalk installed from Levering Avenue to the bridge byway of Route 1 and Main Street. By ignoring the connection into Baltimore County, you are ignoring access to Patapsco Valley State Park, Guinness Brewery, and the MARC train stations of Saint Denis and Halethorpe.

Comments: Due to increased traffic and accidents on BlueStream Drive Us1 intersection, we need signal light. Look like traffic data and accidents data few months/years old. Most of the residents occupied newly built home within past 1 to 2 years. Traffic light help safe movement of traffic on BlueStream drive towards US1.

Comments: I would like to be added to the mailing list for the route 1 project.
Thank you.

We would like the Blue Stream Drive & Route 1 intersection addressed in the report as well. If it is determined that nothing should be done, we believe that should be marked in there.

Subject: US 1 Safety Evaluation presentation of findings follow-up

Dear US 1 Stakeholders:
Thank you for your interest in the US 1 Safety Evaluation. We received excellent feedback at our two recent presentations of the Evaluation’s findings, which built on the previous public input throughout the Evaluation process.
The presentation from the two recent meetings is now available at the project website: www.howardcountymd.gov/US1Safety.
At that site, you can also review the full report and appendices, as well as provide comments via an online comment form. We are accepting comments on the draft report until Thursday, October 25th. After that time, we will finalize the report and continue to move forward with implementation.
In addition, the Howard County Department of Planning and Zoning is moving forward with a master plan effort for the US 1 corridor with the goal of developing an amendment to Howard County’s general plan, PlanHoward 2030. This master plan will build on and will be informed by the many previous Route 1 specific studies such as the US 1 Safety Evaluation and broader initiatives such as the just launched <https://www.howardcountymd.gov/hocoderewrite> HoCo Rewrite to develop transportation, infrastructure, land use and economic development implementation strategies to improve vibrancy and livability throughout the Route 1 corridor, and will result in conceptual development/design scenarios and identify implementation tools that are grounded in market realities. For more information, visit <http://www.howardcountymd.gov/route1>

Comments: I live in Elkridge and drive everyday on route one from Abel Street to Patuxent Range Road in Jessup for work during rush hour. Between 730 and 830, I am going southbound and between 400-530 going northbound.
I have the following suggestions:

In general, there should be a dedicated right hand turning lane for all lanes where there is significant activity either because of residences or commercial properties. An example of where this exists and works well is going northbound on route one and turning right onto Loudon Ave. Areas where this is needed in my opinion on the northbound direction include Montevideo Road and South Hanover Road. Areas where this is needed going southbound include: Rowanberry Drive, Hunt Club Road, Duckett Lane, and Meadowridge Rd.

There needs to be longer left hand turning lanes in the middle of the road when going northbound and turning left onto Rowanberry Drive and Rockside Avenue. Both of these intersections routinely get backed up during rush hour and cause the left lane to come to a standstill. In addition, there needs to be a longer left hand turning lane when going southbound when turning onto Dorsey Road. Dorsey Road gets a lot of traffic for those trying to get off of Route 1 as the 175 intersection can take multiple cycles to get through the light due to the design and the volume.

The entire 175 and route 1 intersection needs to be studied separately to come up with better ways of moving traffic during rush hour. In the evening rush hour, traffic trying to go westbound on 175 from Northbound 1 routinely backs up past Assateague Drive and causes the lanes trying to go straight on route one to come to a standstill. I have seen this back up as far as Mission Road on occasion. Additionally the traffic trying to go westbound on 175 from Southbound 1 gets bogged down by the gas station. You should consider taking the first 10 feet from the Shell gas station as well as the adjacent shopping center to create a new lane that connects to the lane coming from the Verde apartments. Additionally the entrance to the flea market needs a dedicated right hand turning lane when going southbound on route 1.

The entrance to route 100 when going southbound on route 1 needs a longer dedicated turning lane as traffic routinely gets backed up because the turning lane is so short. Additionally the Hillside Road entrance to the storage unit presents an issue for those trying to get onto 100 ramp as drivers are not expecting people to turn there. Consider an additional right hand turn lane for that property as well or consider closing that road altogether and opening up a new road elsewhere.

Additional lights should be added to those roads where there is significant activity. These include Hunt Club and Port Capitol. Additionally I’d add a light for the flea market and only make it operational during the weekends when activity is heavy.

Sidewalks are needed on both sides of the road. There is a sidewalk on one side of the road from Montgomery Road all the way to Troy Hill but nothing on the other side. With the addition of the library, foot traffic has increased around Rowanberry so sidewalks are needed on the other side. I'd suggest starting it on Old Washington from Montgomery and taking it all the way to Loudon Avenue. Once installed there should be a delayed green light so that people have more time to cross the street to get to 7-11 or the library. In addition, I'd add the same feature to the intersection of Route 1 and Montgomery. There is a lot of foot traffic there, especially younger middle school kids that walk to school.

Thanks for working to make our community safer.

Geoff Pickett

Comments: People are either getting involved or nearly escaping the accidents near blue stream and route 1 intersection especially during heavy traffic, I myself experienced this couple of occasions, for the safety of the people, I sincerely request for a traffic light at Blue Stream and Route 1 intersections. Always better to be safe than sorry.
Please do consider our request.
Thank you,
Pavan Pulluri

Comments: AREA 1
I’m pleased to see that this plan includes a pedestrian activated signal across Route 1 at Brewers Court.
The situation with pedestrians crossing to catch a bus is extremely dangerous.
Please also include a pedestrian marked crosswalk preferably signalized across Brewers Court on both sides of Route 1.
AREA 2
I am very concerned about pedestrian safety at the intersection of Guilford Rd. and Route 1.
So I am pleased to see the planned improvements call for upgrading the intersection to include pedestrian signals, curb ramps, and marked crosswalks.
AREA 3
It makes sense to strengthen the connection between Howard Square/Port Capital and Blue Stream.
However, I am somewhat surprised that the plan proposes to move bikes and pedestrians away from Route 1 in the very area where the County and the developer have already begun to create a more bikeable/pedestrian friendly Route 1. If this is the direction the county chooses for this area, perhaps the County will have to relook at approving developments so close to the street (which from what I understand are intended to foster bikeability and be pedestrian friendly.
AREA 4
I’m concerned that this plan does not include a pedestrian solution near Brumbaugh on Route 1, west of the train tracks.
OTHER
I applaud the changes to implement a more consistent speed limit throughout the length of Route 1 to improve the safety of drivers, bikers, and pedestrians.
Pedestrian bridges are needed throughout the Route 1 corridor. They could be especially useful near Troy Hill and Duckett Lane.
All planned bike lanes along Route 1 should include bollards, or some other form of physical barrier, to ensure biker safety.

Comments: I think the top priority is the sidewalks and then bike lanes. If can be done at the same time, great. if not, sidewalks first. More walkers than bikes on Rt. 1. Needs to be From county line to county line. Some areas are upgraded so you just need to connect the missing pieces. N. Laurel road to Main Street Laurel has many walkers along Rt. 1 to reach the MARC station. There should also be bus lanes. Some areas have a pull off but others do not. This is very dangerous. Glad to see someone is looking at this. This will also improve the looks and flow of Rt. 1. Thank you

Comments: “...buffered one-way bike lanes. The proposed bike facility will provide a five foot northbound and five foot southbound bike lane each buffered by a five foot hatched area. The existing properties and side streets along this segment of US 1 are low traffic generators but it is recommended to reduce the speed limit to 30 MPH in this segment to further enhance traffic safety. Such an operational change is consistent with this segment’s designation in the Route 1 Manual as a corridor activity center district.”
I and others I know have commuted on this stretch on foot, wheelchair, bicycle, bus, and car. There are times a person is only able to walk or wheelchair when they must commute on the corridor. The walking should be a mainstay of commute option in design of this corridor. I urge installation of “protected bicycle lanes” on both sides of route 1, as they serve to guard against vehicle collision better than “buffered bicycle lanes”.
-Speaking as a multimode commuter and especially motorist, as protected bike lanes serve to reduce injury for all road users.
Increased foliage is a must to improve our corridor. Soils, undisturbed roots, and more foliage is what it takes to manage particulates and carbon pollution. More foliage makes corridor commutes more pleasant, & attractive.

Comments: I appreciate the recognition that the Rowanberry/US 1 intersection is an ideal place for safer crossing across Route 1. This corner is home to a shopping center, new library, and less than 1/2 mile from a planned 400-unit development where sidewalks do not currently exist or are intermittent. The community has requested through this development, but even more appropriately through this safety plan, construction of a pedestrian bridge at some point on Route 1 between Ducketts Ln. and Rowanberry. Not only would this bridge greatly enhance pedestrian safety, particularly for youth and families, but would also contribute significantly to the revitalization of Route 1, providing a central "hub" for the Elkridge area.
In addition, I would like the safety planning team to explore the need for a traffic light at Hunt Club and Route 1. There are several cars from this neighborhood that are forced to turn left onto Route 1 heading north, while simultaneously large trucks and big rigs are turning left out of the UPS complex, heading south. Cars and big rigs often engage in "near misses" in the median lane, and cars are waiting for long periods of time to turn out of Hunt Club. Cars often bypass this by driving through the library parking lot and entering Route 1 at the signal at Rowanberry. A double signal and crosswalk/bridge on either side of the library would be beneficial.
