Stormwater Management (SWM)- Stormwater Management will consist of non-structural practices including drywells and disconnections in accordance with the 2000 MDE Stormwater Design Manual.

Environmental Features- There are no environmental features or forest located on the subject property.

Landscaping- Landscaping complies with the Howard County Landscape Manual and Design Criteria. Existing trees will be retained to satisfy the perimeter landscaping requirements.

Forest Conservation- The Forest Conservation Act requirements will be met by providing 1.7 acres of onsite afforestation and purchasing the equivalent of 0.2 acres from an offsite forest conservation bank.
Adequate Public Facilities - Allocations in the Rural West Allocation Area are currently available but will not be finalized until the project has been approved by the Planning Board and the Decision and Order has been executed.

Planning Board Criteria: The Final Plan complies with the two criteria requirements of Senate Bill 236, The Sustainable Growth and Agricultural Preservation Act of 2012:

1. The cost of providing local governmental services to the residential major subdivision unless a local jurisdiction's Adequate Public Facilities Ordinance already requires a review of government services.

   Howard County has an Adequate Public Facilities ordinance therefore this requirement has been met.

2. The potential environmental issues or a natural resources inventory related to the proposed residential major subdivision.

   There are no environmental features on the subject property.

SRC Action: The SRC determined the Final Plan can be approved, subject to addressing minor drafting errors that must be corrected prior to DPZ signature approval.
