Project Process & Timeline

- **Begin Data Collection**: Fall 2018
- **Kick-Off Meeting**: January 2019
- **Traffic Analysis**: Spring 2019
- **Concept Development**: Summer 2019
- **Presentation of Concept & Analysis**: October 2019
  - Public Input
- **Refine Concept & Document Input and Analysis In Feasibility Report**: Fall 2019
  - Public Input
Feedback: What We’ve Heard

- Very Dark.
- Difficult to cross on foot, at Dawn Day Drive.
- Cars go too fast.
- High speeds make on-road biking difficult.
- Often, road terrain combines with speed to limit sight distance from side streets.
- Lack of Continuous Sidewalk, along east side.
- Difficulty turning left from Oakland Mills, particularly when opposing vehicle is also turning left.
- Congestion at Snowden River.

Additional Comments
- Lack of a Bike Lane
- Not comfortable with on-road biking
- Convenient access to major roads
- Generally, not congested
- “Low-traffic short-cut” road
